SUMMARY

I have experience working with the MERN stack and have a strong desire to create dynamic, high-quality online apps. I can take on challenging computing problems and provide effective answers thanks to my problem-solving abilities and proficiency in C and C++. I perform best in group situations and am constantly eager to work with others to accomplish project objectives. Additionally, I continuously update my knowledge and keep up with the most recent web development techniques and tools because I am a quick learner.
